

MANGO

Mango puree and mango concentrate are two of the many types of commercial-grade products supplied by iTi Tropicals.

Fruit Overview:

Mango is a peach-like, juicy fruit, with a single large kidney-shaped seed. The fruit is grown mainly in Asia, South America, and Arabia and is known for its pleasant flavor. Mangos have a significant amount of dietary fiber and are packed with vitamins, antioxidants, and minerals. One small mango provides a quarter of the recommended daily allowance for vitamin C, nearly two thirds of the daily quota for vitamin A and good amounts of vitamin E and fiber.

Food Application:

Our mango puree, mango concentrate, mango essence, and organic mango puree pair well with a wide range of food applications like fruit juices, frozen desserts, smoothies, ice cream, baby foods, sorbets, jellies, and preserves.

Available Product:

iTi offers mango puree, concentrate, and essences from the highest quality sound fruits. All mango products have been cleaned, washed, properly drained, sorted, and inspected. We have various varieties of mango sourced from Mexico, Ecuador, Columbia, and India such as Alphonso, Totapuri, Kent, Tommy, Chato, and mango from the Magdalena River region. We also have organic mango available.
