

Coconut Water Cold Brew Coffee. Plant-Based Magic.

Diversify your product line with coconut water —
tasty, hydrating, and packed with electrolytes.

Looking to add a drink that's both refreshing and energizing to your product line? Look no further; cold brew coffee made with coconut water is the perfect beverage to boost your energy and keep you hydrated.

Why Coconut Water?

Coconut water is a well-rounded ingredient with the ability to enhance nearly any product formula in a positive way. Whether you already sell coconut water or are looking to incorporate this tropical ingredient into your product line, here are a few benefits of coconut water to consider!

- It has **five essential electrolytes**, including potassium, magnesium, and calcium.
- It has **no added sugar, fat, cholesterol or preservatives**, and is significantly lower in calories than many other juices.
- It provides added **mouthfeel and body** to your cold brew coffee product.

How is Coconut Water Cold Brew Coffee Relevant to Your Business?

Get Innovating with Our Cold Brew Recipe Below!

Preparing Coffee Concentrate

Ingredients	Amount	Percentage
Cold Brew Coffee	2 sachets	Excluded from total
*iTi Tropicals Coconut Water Concentrate	3.20 oz.	6.67%
*Water	44.8 oz.	93.33%
Total	48.0 oz.	100%

1. Combine iTi Coconut Water Concentrate with water, mix well.
2. Add the sachets of coffee to the coconut water. Place in the refrigerator for 24 hours. This will create a coffee concentrate. Now dilute!

Coconut Water from Concentrate for Diluting

Ingredients	Amount	Percentage
*iTi Tropicals Coconut Water Concentrate	2.40 oz.	6.67%
*Water	33.6 oz.	93.33%
Total	36.0 oz.	100%

1. After brewing, remove the coffee sachets and discard.
2. Combine the "prepared coffee concentrate" with the "coconut water from iTi Coconut Water Concentrate for diluting". Mix well, serve chilled.
